

A Few Fabulous, Fun Voice Facts

- Adult vocal folds (not cords) are on average the size of a postage stamp, yet they can entertain a whole stadium.
- Every voice is as unique as its owner's fingerprints.
- To produce a phrase, about 100 muscles of the chest, neck, jaw, tongue and lips must work in sync like an orchestra.
- If the eyes are the window to the soul...the voice is its barometer.
- A healthy voice is a dead 'giveaway' of your emotions.
- Voice is evident from the minute a baby cries (then you often wish you could find the "off button")
- Voice is the cheapest, most portable and unique instrument known to mankind – its always on hand and ready to play (with a little bit of warming up).
- Why is it that we NEVER think about our voice until it doesn't work - yet as we get older we have regular hearing & eye health checks?
- The cost of voice issues (amongst Australian teachers alone) is approx. \$71mil p.a
- Hearing and Vision issues receive funding Voice health receives NONE.
- Finally can you imagine TV & radio without voice ?
